## Cars Trans ATF CVT

This is a full synthetic lubricant based on carefully selected very high quality base oils, that has been designed to be used in most CVT gearboxes. It is suitable for continuously variable transmissions, using steel push-belts or chains. It offers outstanding anti-wear protection and stable friction characteristics.

## Features

Anti-wear protection : significantly extended transmission life. Frictional properties : very smooth gear shifting, no vibration. Extended oil life : excellent thermal and oxidation stability

## Applications

OEMs usually recommend specific CVT fluids for their transmissions. By carefully balancing base oils and advanced additives, it has become possible to formulate this fluid that meets the requirements of both European and Japanese CVT manufacturers. This product may not be used in some hybrid vehicles, requiring special fluids
